

ProDevice DGX02 shredder

THE PRODEVICE DGX02 ENSURES COMPLIANCE WITH THE MANDATES, REGULATIONS AND SECURITY GUIDELINES

DIN66399

- H-5 for hard drives with magnetic data media
- O-2 for optical data media
- T-3 for magnetic tape media
- E-2 for electronic data media

DMS 2008 / level C for physical HDD destruction

Destroying data carriers with the ProDevice DGX02 device causes disks, tapes, tablets or mobile phones to be crushed into small pieces- information stored on them can't be recovered. So, DGX02 is a perfect solution for companies and institutions that care for the highest standards related to the protection of confidential data, defined by GDPR.

Mobile, automatic shredder ProDevice DGX02 (Data Grinder Xtreme) is the latest generation device for the final, physical destruction of all types of data media: streamers tapes, floppy disks, optical disks, 2.5" and 3.5" hard drives, flash media and SSDs, mobiles, tablets, laptops.

FEATURES

- Safety of use due to the „closed” housing of the device.
- Integrated emergency switch.
- Full mobility and the possibility of transporting with a delivery vehicle.
- Powerful engine adapted for continuous work.
- Simple and intuitive control system - integrated control automation.
- Gravity system for discharging damaged materials to prevent blocking the device.
- A durable plastic container (sealed) with a trolley - crushed data carriers come directly to it.

TECHNICAL SPECIFICATIONS

Engine power	5,5 kW
Power supply	400 V
Width of the piece after crushing	15 mm
Dimensions	Width 88cm x Depth 100cm x Height 132cm
Weight	600 kg
Dimensions of plastic container for crushed storage media	80cm x 60cm x 45cm

The drawer feeding system is equipped with a safety device to ensure safe to use. Destroyed discs or other digital information carriers go directly to a special, durable plastic container, placed on a transport trolley (with a capacity of up to 250kg). In this way, damaged media can be easily transported.

DGX02 is the only such type of shredder that can be sold both in the stand-alone variant (on rubber stabilizing legs - a pallet truck is used for transport purposes), as well as dedicated transport wheels equipped with brakes. When designing it, special attention was paid to the mobility of the device, with particular emphasis on its lowest weight and dimensions. This means that the machine can be transported by virtually any delivery vehicle weighing up to 3,500 kg.

ProDevice

ProDevice is a leader of innovative technologies on the market for destroying information from electronic data carriers. The most modern R&D center of this type in the world, is the place of designing, testing and producing all brand devices. The cooperation of qualified engineers with the most outstanding scientific units in the country results in the implementation of the most advanced development projects related to modern technologies in the field of data removal. ProDevice products are currently sold in more than 30 countries around the world through an extensive network of Partners.
